DETAILED ACTION

The following is an examiner's statement of reasons for allowance:

With respect to claims 1-25 of USPN 6,943,938, it is noted that claims 1-18 of the present application are patentably distinct for at least reciting "a compensator configured to rotate oppositely with the optical filter to compensate a lateral shift in a light beam passing through the optical filter" (claim 1) or "a compensator optically coupled between the filter mirror assembly and the third collimator" (claim 11). Claims 2-10 and 12-18 are derived from claims 1 and 11.

The compensating element recited within the context of claims 1 or 11 –when taken as a whole- also distinguishes the claims of the present application from the cited prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication should be directed to Mark Hellner at telephone number 571 272 6981.
